

HARROW

HEALTH | INC.

Corporate Presentation | November 2021

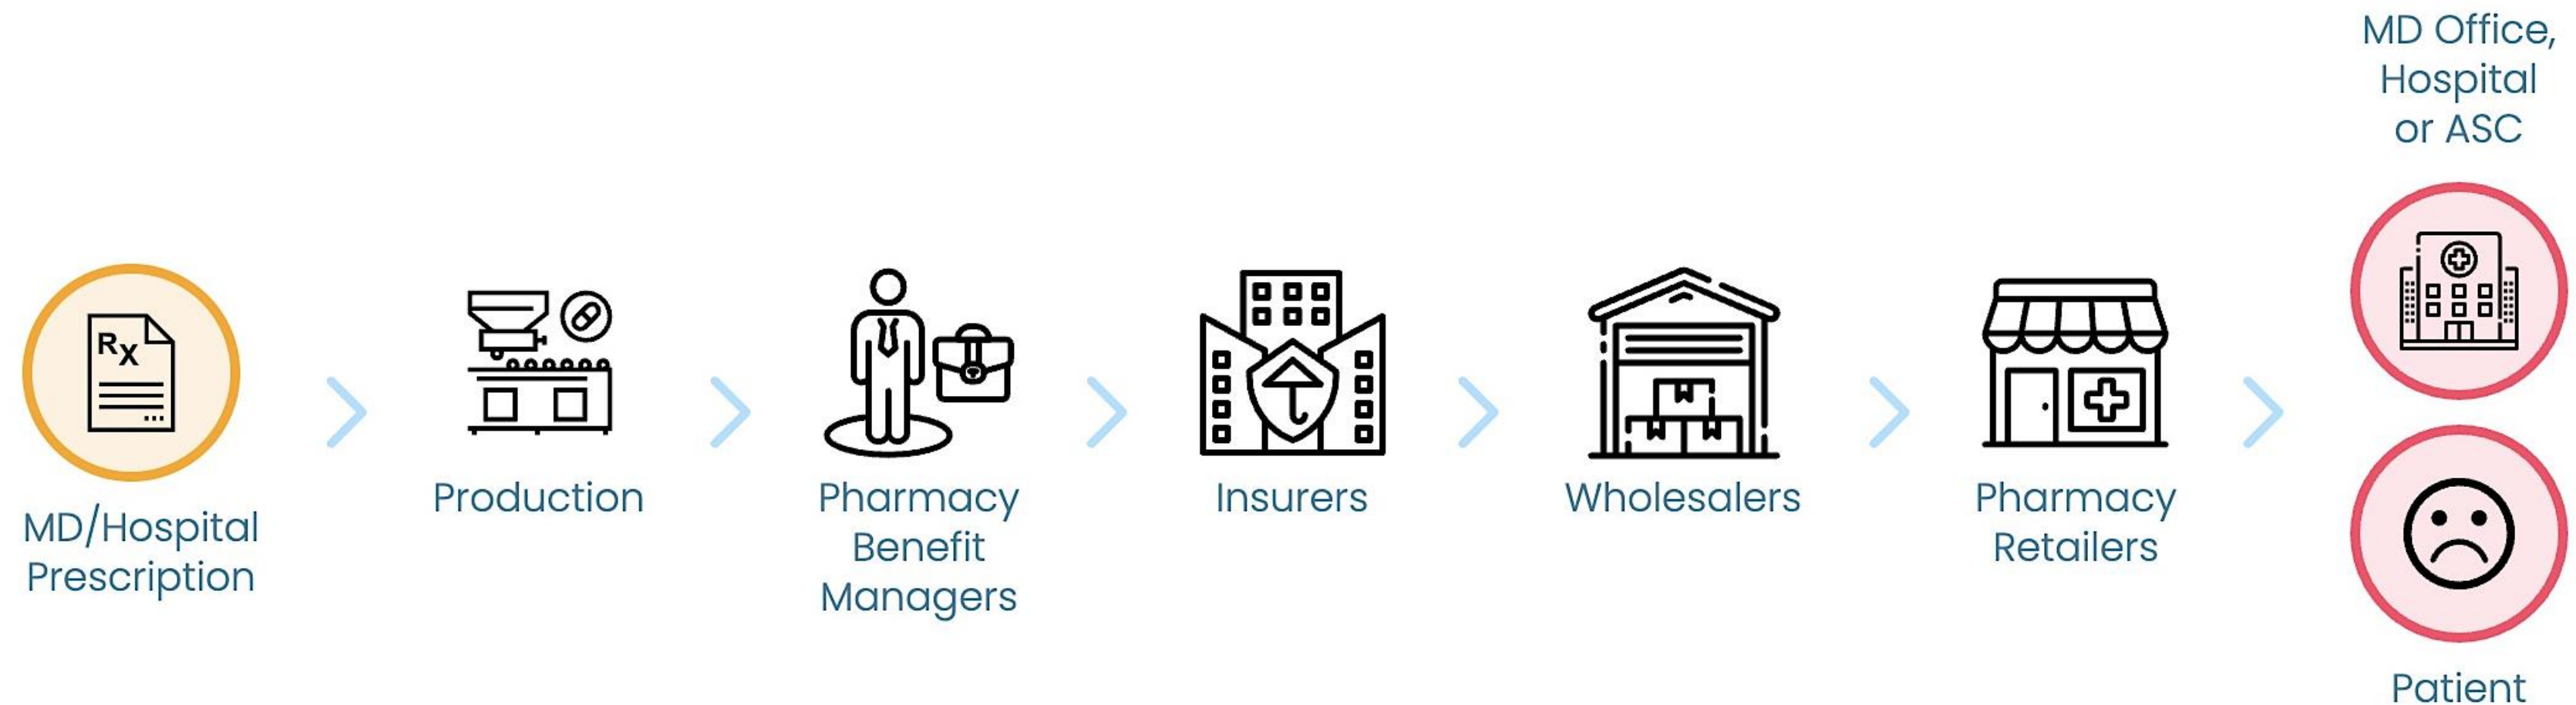

Safe Harbor

This presentation contains express “forward-looking statements” as defined in the U.S. Private Securities Litigation Reform Act of 1995. You are cautioned not to rely on these forward-looking statements. These statements are based on current expectations of future events. If underlying assumptions prove inaccurate or known or unknown risks or uncertainties materialize, actual results could vary materially from the expectations and projections of Harrow Health, Inc. (the “Company” or “Harrow”). Some of these risks and uncertainties include, but are not limited to: the impact of the COVID-19 pandemic and any future health epidemics on Harrow’s financial condition, liquidity and results of operations; the Company’s ability to gain market approval (i.e., FDA) of its drug candidates; the Company’s ability to make commercially available its formulations, drug candidates and technologies in a timely manner or at all; market acceptance of the Company’s formulations and challenges related to the marketing of the Company’s formulations; risks related to Harrow’s compounding pharmacy operations; the Company’s ability to enter into other strategic alliances, including arrangements with pharmacies, physicians and healthcare organizations for the development and distribution of the Company’s formulations; its ability to obtain intellectual property protection for its assets; its ability to accurately estimate its expenses and cash burn and raise additional funds when necessary; its ability to generate profits from sales of its formulations; risks related to research and development activities; its estimates of the current and potential market size for its technologies and formulations; unexpected data, safety and technical issues; regulatory and market developments impacting compounding pharmacies, outsourcing facilities and the pharmaceutical industry; competition; and market conditions. More detailed information about the Company and the risk factors that may affect the realization of forward-looking statements is set forth in the Company’s filings with the Securities and Exchange Commission, including its Annual Reports on Form 10-K and its Quarterly Reports on Form 10-Q filed with the SEC. Such documents may be read free of charge on the SEC’s web site at www.sec.gov. All forward-looking statements are qualified in their entirety by this cautionary statement. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Harrow expressly disclaims any intent or obligation to update these forward-looking statements except as required by law. The Company’s compounded formulations are not FDA approved. All trademarks, service marks and trade names included in this presentation are the property of their respective owners. This presentation may refer to non-GAAP financial measures, specifically adjusted EBITDA and equity values of equity positions in non-controlled investments. A reconciliation and/or further description of any non-GAAP measures with the most directly comparable GAAP measures are included in the Company’s Letters to Stockholders, available on its website, and as an annex to this presentation.

Harrow Health, Inc.

- Harrow is a growing leader in the U.S. ophthalmic healthcare market.
- Harrow has built a strong market position by selling high-value ophthalmic drugs to institutions, which now includes over 10,000 doctors, hospitals and ASCs.
- Our growth strategy is to expand our current reach by:
 - Continuing to organically grow our market-leading **ImprimisRx** ophthalmic business;
 - Creating new commercial partnerships to grow revenues; and
 - Acquiring FDA-approved drugs and late-stage product candidates.
- In the third quarter of 2021, Harrow:
 - Signed a pharmacy partnership to sell prescription-based Avenova®;
 - Purchased AMP-100, an anesthetic drug candidate for intraoperative ocular pain management; and
 - Purchased MAQ-100, a drug candidate for visualization of the vitreous during vitrectomy.

Traditional Pharmaceutical Value Chain

- Layers of middle-men thrive.
- “Tiered” formularies and layers of intermediaries “feed” an opaque system.
- “Discount cards” and “access” programs try to soften consumer costs and confusion.
- ***Prescribers and consumers view pharmaceuticals and pharmacy as a pain point.***

Harrow's Simple Approach

- Cash-pay focused.
- No pharmacy benefit managers (PBMs), wholesalers or distribution “middlemen.”
- No prior authorizations, formulary rejections, rebates, or discount cards.
- ***We make pharmaceuticals and pharmacy simple and transparent.***

ImprimisRx

- The leading FDA-registered cGMP ophthalmic pharmaceutical drug compounder.
- Fully-integrated national sales and customer service teams, and an efficient, scalable, and tech-enabled national distribution platform.
- Ophthalmic surgical and chronic eyecare markets are large and growing:
 - 16+ million U.S. dry eye disease patients;¹
 - 8+ million annual ophthalmic surgeries;² and
 - 3+ million U.S. glaucoma patients.³
- Product lines supported by 60+ patents and peer-reviewed literature.
- Service 1,500+ monthly accounts of over 10,000 prescribers and institutions.
- Net Promoter Score ranked consistently in 80s and 90s throughout 2020 and 2021.
- Partnered with Eyepoint Pharmaceuticals to promote DEXYCU®; *delivering record results.*

²According to a 2019 report by Marketscope, a third-party provider of market data.

³According to Glaucoma Research Foundation: <https://www.glaucoma.org/about/fast-facts-glaucoma-research-foundation.php>.

AMP-100 (Ocular Surface Anesthesia)

- Clinical and pre-clinical studies for AMP-100, a patented non-opioid ophthalmic surgical drug candidate, demonstrated:
 - Safety, with most common side effect being mydriasis (pupil dilation), which most ophthalmologists consider beneficial;
 - Clinical effect is similar to other anesthetics in its class (e.g., tetracaine); and
 - Rapid onset of action with predictable duration.
- Protected by one issued patent, with a second patent pending for broader coverage.
- A new drug application (NDA) is expected to be submitted to FDA in 4Q 2021; if approved, commercial focus will be ophthalmic procedures requiring the eye to be anesthetized:
 - September 2021 Market Scope report cites 2Q21 procedure volumes annual run rate for U.S. cataract surgeries (over 4.5 million) and intravitreal injections (over 8 million).

MAQ-100 (Visualization During Vitrectomy)

- MAQ-100 is a preservative-free triamcinolone acetonide ophthalmic injection.
- Sold in Japan since 2010 under the name MaQaid® for various indications, including visualization of vitreous during vitrectomy.
- Harrow intends to leverage the clinical data used for Japanese market approval to support a U.S. and Canada market NDA submission initially for visualization of the vitreous during vitrectomy.
- In early 2022, Harrow expects to speak to the FDA about clinical plans for MAQ-100.
- Based on a September 2021 Market Scope report, U.S. vitrectomy annual procedures are estimated at 400,000 on a run rate basis.

Harrow Health Innovation Pipeline*

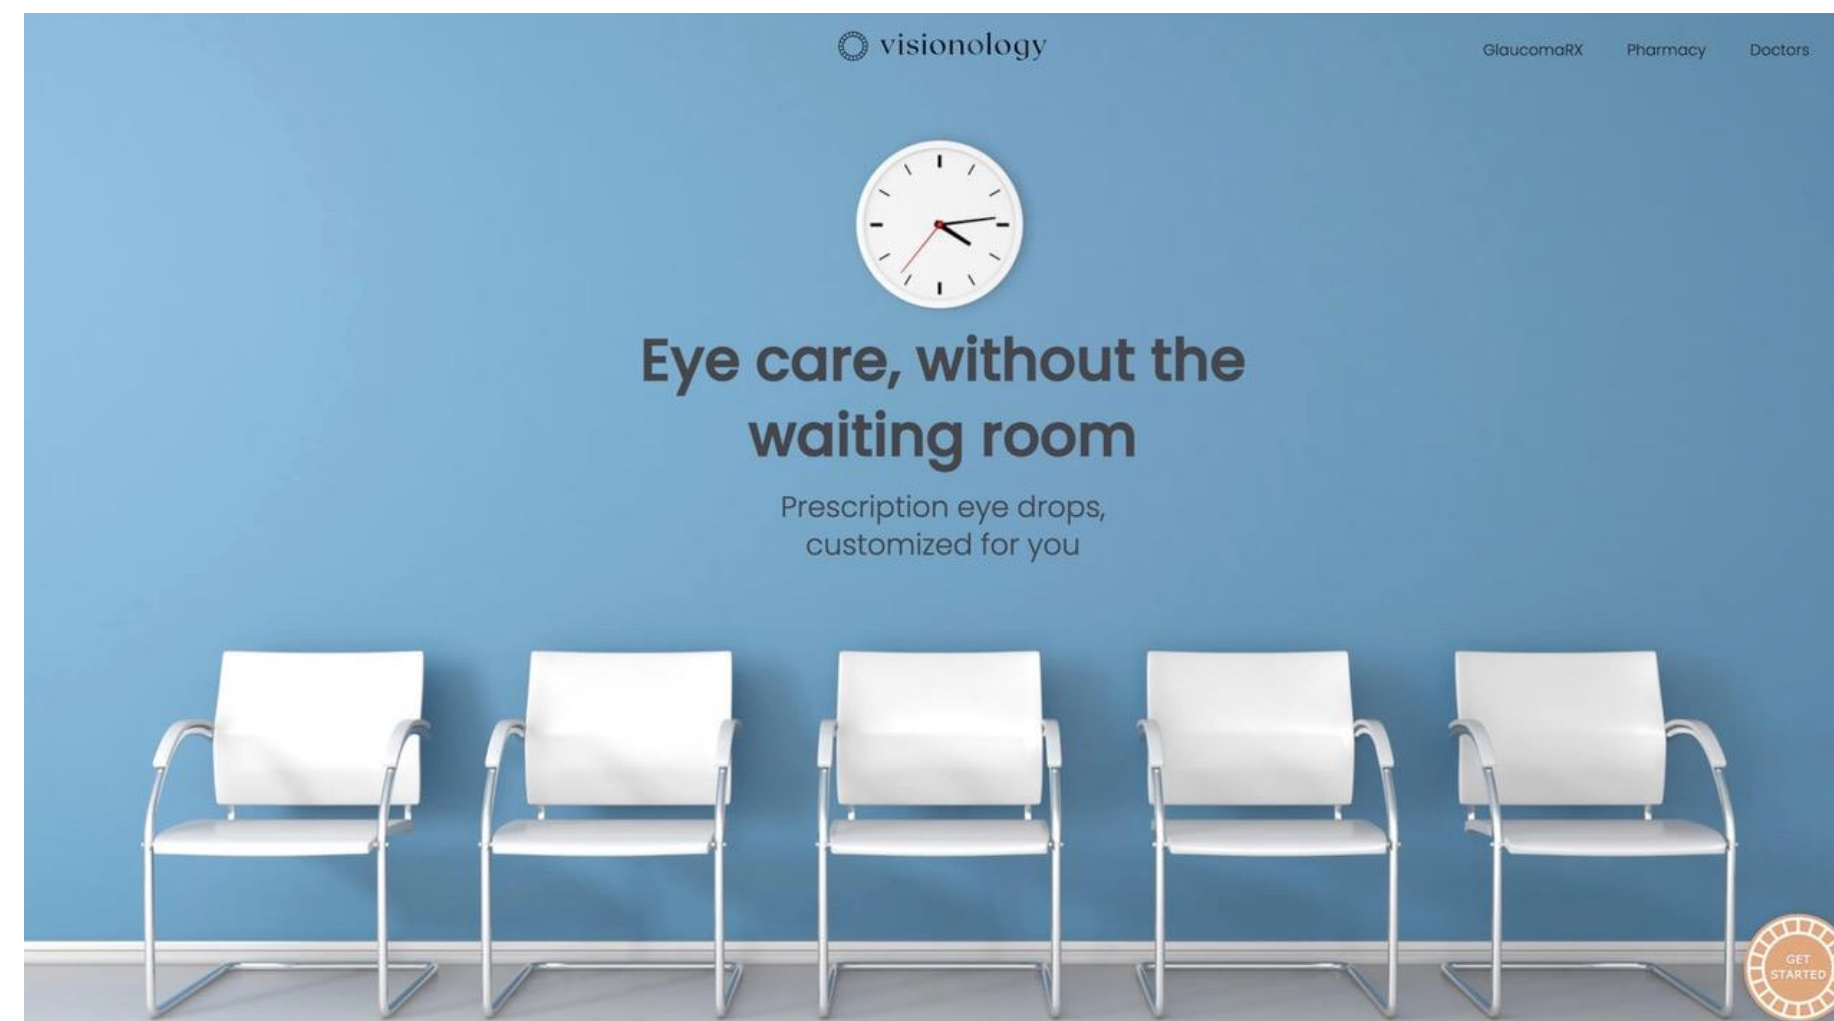

- By partnering with doctors, Harrow has developed compounded products to address unmet patient needs, both large and small, helping eyecare professionals take care of their patients.

	Pre-Formulation	R&D Stability Studies	Clinical Evaluation	Commercial Launch
050-Fortisite™ Patent-pending antibiotic; potentially blinding conditions	▶			
010-Mydria-Gel™ Patent-pending; mydriatic and analgesic	▶			
130-Vizicaine™ Patent-pending; ocular surgery visualization	▶			
HROW-120 Patent-pending; presbyopia	▶			
HROW-090 Stable antibiotic formulation; blepharitis/MGD	▶			
HROW-110 Patented cyclosporine-A and steroid; acute dry eye disease	▶			
Eight additional compounded product candidates in various stages of development.				

* All listed compounded formulations are not specifically approved by the U.S. Food and Drug Administration to treat a specific disease or condition. These formulations may only be prescribed for an individually identified patient to treat a medically necessary condition for which an existing approved product is not recommended by a treating physician.

Visionology

- Direct-to-consumer eyecare subsidiary of Harrow founded in 2020.
- Focused on helping patients manage chronic eye disease using a simple and seamless user experience that was designed after 1,200 consumer interviews.
- Launched regionally in May 2021.
- Leverages our Eyecare-as-a-Service™ model to drive value, transparency, and access.

Revenues, Gross Margin and Assets

Harrow Health Drug Candidate Royalty Pipeline

- Harrow Health owns royalty rights on out-licensed drug candidates in clinical development at both Surface Ophthalmics (4% royalty) and Melt Pharmaceuticals (5% royalty).
- The markets for Surface’s and Melt’s drug candidates are in the billions of dollars annually.

	Pre-Clinical	Phase 1	Phase 2	Phase 3	NDA Filed
SURF-201 Prevention of post-cataract surgery inflammation	▶				
SURF-200 Treatment of acute dry eye disease	▶				
SURF-100 Treatment of chronic dry eye disease	▶				
MELT-300 Procedural sedation and analgesia	▶				

Harrow Health, Inc.

- Positioned to be a high growth eyecare-focused healthcare company.
- Revenues expected to exceed \$100M within the next few years, and to accelerate through the acquisition of high-value products.
- Expense discipline captures significant income on incremental revenue growth.
- Strengthened cash position in 2Q21 – raised \$85M by issuing senior *unsecured* notes (\$75M) and selling a portion of our holdings in Eton Pharmaceuticals (\$10M).
- Holds large equity positions in three clinical-stage and commercial pharma companies, along with royalties in four funded drug development programs.
- We believe we have the resources to finance the next stage of development, which includes **organic growth** and **adding new high-value products** to our **ImprimisRx** and **Visionology** platforms.
